

Benchmark Property opened its doors on 1 June 2011 with a commitment to provide real property solutions to all property owners. The executive team has worked in property management for over 100 years cumulatively, on properties ranging from one-bedroom cottages to some of the largest and high-profile shopping centres and office complexes in the country and abroad.

Our objective and client service offering is simple - we provide management, strategic advice and agency to property owners. We understand the diversity of property ownership within Ireland and can adapt our services to suit all types of property ownership and service requirements.

Our Residential Letting & Management Service is focused on keeping properties occupied with the right tenant. We understand the value in good tenants and endeavour, on behalf of all of our clients, to provide excellent service to tenants in performance of landlord duties under law and lease while maximising the return from the property to the landlord.

We fully understand the landlord's responsibilities under Irish Legislation and ensure that we are fully up to date with legislative changes to protect our clients. We believe in providing a comprehensive service to property owners ensuring that all maintenance, insurance, registration and financial matters are attended to accurately, promptly and efficiently.

Our staff are fully qualified, and we carry Professional Indemnity Insurance to provide our clients with comfort and financial re-assurance and hold a current tax clearance certificate.

We are licensed by the Property Services Regulatory Authority to provide sales, lettings and management services (license no. 001470).
